

ADVANCED CERTIFICATE IN APPLIED BEHAVIOR ANALYSIS (ONLINE)

The College of Education offers a 27 credit-hour program leading to an advanced certificate in applied behavior analysis. Our program is registered as licensure-qualifying by the NYS Education Department. Our program helps students meet the educational requirements to become a licensed behavior analyst, providing the foundation for graduates to practice independently in the state.

The advanced certificate in applied behavior analysis is open to students who hold a master's or higher degree in a related field, such as education, psychology, or other subject areas that address learning and behavioral change.

Code	Title	Credits
