

# ACCOUNTING (ACC)

## **ACC 505 — Financial and Management Accounting (VAU) (3 credits)**

This course covers fundamental concepts and procedures of financial and management accounting for business decisions. Financial accounting provides information primarily for external decision makers such as investors, creditors, suppliers, and government agencies. Management accounting serves the needs of managers to fulfill organizational objectives. Case studies will illustrate accounting and ethical issues. Topics include generally accepted accounting principles, international accounting standards, financial accounting procedures, financial reporting, inventory and depreciation methods, and cost analysis.

## **ACC 506 — Intermediate Financial I (VAU) (3 credits)**

This course covers the requirements as specified in CPA Canada's model course syllabus. Topics covered include the conceptual framework for Canadian financial reporting based on IFRS and ASPE, defining the four parts of the CPA Canada Handbook. Revenue recognition, inventory valuation, intangible assets, goodwill, passive investments, impairment of assets and non-monetary transactions, long-term liabilities, reporting of changes in accounting policy and accounting errors.

## **ACC 507 — Intermediate Financial II (VAU) (3 credits)**

This course will cover the requirements as specified in CPA Canada's model course syllabus. Topics include accounting for leasing, the reporting of assets such as mineral and agricultural assets, the equity method of accounting, reporting of investment properties, decommissioning costs and provisions, onerous contracts, deferred income taxes, complex financial instruments, such as derivatives. Basic and diluted EPS. Reporting of employee benefits. Coverage of these topics will be done within the perspective of both IFRS and ASPE. Accounting for partnerships will also be covered.

## **ACC 601 — Strategic Accounting Analysis and (VAU) (3 credits)**

*Prerequisite Take ACC\*505 or UG equivalents*

An advanced core course in strategic accounting which focuses on the interpretation and analysis of accounting information for business decisions. Case studies will be used to illustrate strategic decision processes. International accounting issues will be addressed. Topics include financial statement analysis, cash flow, case studies in budgeting, total quality management, activity-based management, target costing, job-order cost systems, cost allocation methods, and variable costing.

## **ACC 602 — Advanced Business Tax Strategy (VAU) (3 credits)**

*Prerequisite Must have taken ACC\*505;*

This course begins with an overview of business taxation in the United States, and international tax planning issues. This foundation serves as a basis for the development of business tax strategies for successful competition in the global marketplace. Research and case studies of international tax issues are explored. Topics include tax planning and administration, choice and tax implications of business entities, international tax principles, wealth management, and ethical issues.

## **ACC 603 — Advanced Accounting Theory (VAU) (3 credits)**

*Prerequisite Must have taken ACC\*505 and ACC\*601;*

This course explores the underlying concepts of financial accounting theory and its application to current accounting practice. Standards of the U.S. Financial Accounting Standards Board (FASB) and the International Accounting Standards Board (IASB) are emphasized. Topics include the conceptual framework of accounting, financial accounting and reporting standards, and the rationale for generally accepted accounting standards. Research into the development of accounting theory is included.

## **ACC 604 — Advanced Auditing (VAU) (3 credits)**

*Prerequisite Take ACC\*505 ACC\*601*

An advanced course in audit theory and practice, covering auditing concepts and procedures, audit research, computer auditing, and Securities Exchange Commission (SEC) audits. Computerized audit problems and case studies illustrate audit concepts and practice.

## **ACC 605 — Internal Controls (3 credits)**

The course expands students' basic knowledge of Internal Controls, using the COSO framework as a guide. Areas covered are risk assessments, the control environment, control activities, obtaining evidence and testing, conducting interviews and specific reporting requirements. There will be hands-on experience through case work and real-world internal control assessments.

## **ACC 606 — Governmental and Non Profit Accounting (3 credits)**

*Prerequisite ACC\*505*

A study of the special features of accounting and financial reporting for governmental and not-for-profit entities including state and local governments, healthcare entities, universities and colleges, public schools, voluntary health and welfare organizations, and other not-for-profit entities.

## **ACC 607 — Appl Accounting Info Systems & Analytics (3 credits)**

This course covers the conceptual foundations that accounting builds upon as an information system to analyze, record, summarize and report business activities, the control of the accounting information system, and accounting data analytics. Students are required to complete a variety of applied information systems projects that will give them hands-on experience with enterprise resources planning, internal control over financial reporting, and accounting data analytics and visualization.

## **ACC 614 — Topics: (3 credits)**

This graduate seminar examines contemporary issues and emerging developments in the accounting profession. Topics vary by semester based on current industry needs, regulatory changes, and student interests. The course provides in-depth analysis of specialized accounting areas through case studies, research projects, and professional discourse. Topics include, but not limited to, IFRS, AI, International accounting, etc.

**ACC 615 — Canadian Adv Financial Reporting (VAU) (3 credits)***Prerequisite Take ACC 506 and ACC 507*

The course will cover requirements as specified in CPA Canada's model course syllabus in Advanced Financial Reporting. Topics include financial reporting of foreign currency transactions and translations of foreign operations, reporting of business combinations. The equity method of accounting in an associate, and reporting of hedging contracts and hedged positions. The growing impact of changing technologies on financial reporting systems is also covered. An introduction to Accounting Standards for Not-for-Profit Organizations (ASNPO) is provided.

**ACC 617 — Taxation Canadian CPA (VAU) (3 credits)***Prerequisite Take ACC 506 and ACC 507*

Tax filing requirements, and assessments are covered. CCA, UCC, and terminal losses are also covered. Income and various types of property are discussed. Calculation of net income, income attribution rules and deductions are covered. The Lifetime Capital Gains Exemption (LCGE), and various savings plans (RRSP, TFSA, RESP) are reviewed. Tax payable from corporations is also reviewed. This course concluded with a discussion of the Goods and Services Tax.

**ACC 618 — Audit and Assurance (VAU) (3 credits)***Prerequisite Take ACC 506 and ACC 507*

Key concepts in professional auditing as found in the CPA Canada Handbook - Assurance are covered. Topics include client acceptance and audit planning, internal controls, and reporting audit results. Students will gain an understanding of audit reviews, compilations, and review engagements. Concepts covered include risk management, approaches and procedures related audits.

**ACC 619 — Integrated Studies I (VAU) (3 credits)***Prerequisite Take ACC 506 and ACC 507 for students studying at Vaughan*

This course is intended to provide learners with insight into the advanced application of management theory, management accounting, and IFRS. Topics include performance management, business modeling, advanced management accounting, and IFRS. Using the case study method, the strategic implications of these topics will be explored, allowing students to prepare for either of the CPS Canada (Ontario) or CGMA professional accounting exams.

**ACC 620 — Integrated Studies 2 (VAU) (3 credits)***Prerequisite Take ACC 506 and ACC 507*

This course allows students to learn and integrate core management accounting concepts with competitive strategy. At the completion of this course, students will be qualified to write the third and final exam that will allow them to earn the internationally recognized Chartered Global Management Accountant (CGMA) credential. It should be noted, and as discussed later, that this course also aids Canadian students in qualifying to write the CPA Canada (Ontario) Common Final Exam (CFE).

**ACC 650 — International Accounting (3 credits)**

The growth of international business has influenced the way business and accounting are conducted in every country. This course prepares students to operate more effectively in a global business environment. Students will develop a sensitivity to the diversity of accounting standards and reporting practices in the global business community. Group projects, research paper, and case discussions included. Recommended for all students interested in international business.

**ACC 664 — Fin & Man Accounting in Healthcare (VAU) (3 credits)***Prerequisite ACC\*601*

Healthcare institutions, both profit and not-for-profit, are under significant pressure to contain costs and improve the quality of services and products. Today's complex environment places greater emphasis on the financial implications of both managerial and clinical decisions. This course is intended to provide students with an understanding of the principles and theory of both managerial accounting and financial management in healthcare organizations. On completion, students will also have a good overview of the current and historical healthcare financial issues.

**ACC 674 — Income Tax Planning (3 credits)**

This course focuses on federal income tax principles along with current law and practice by concentrating its impact on financial planning. The primary context will be individuals, couples, families, estates, and trusts. It will examine these primary beneficiaries in their role as investors, employees, and business owners. This course is intended to provide coverage of required topics under the current topic list of the Certified Financial Planner Board of Standards (CFP).

**ACC 682 — Topic: (3 credits)****ACC 683 — MBA Accounting Co-Op/Internship (6.00 credits)**

An advanced-level elective course providing relevant paid employment experience. The objective of the course is to integrate classroom theory and practical work experience for students not fully employed. The student must work full time in an approved work environment for either the fall or spring semester or an equivalent number of hours in the summer.

**ACC 685 — CPA Research Strategy & Planning (VAU) (3.00 credits)**

This course is designed to give students a comprehensive review of the advanced topics in auditing and attestation; the general business environment; regulation, including tax and business law; and financial accounting and reporting. The course is intended for students who plan to pursue a career in public accounting. Students are required to complete CPA exam practice problems according to a rigorous schedule. Instructors will lecture on research methods, contemporary accounting issues, and strategies for passing the CPA exam. A fee is required for a user license for a CPA exam review program.

**ACC 723 — Intermediate Accounting I (3 credits)***Prerequisite ACC\*505*

A comprehensive study of the preparation and use of financial reports for business decisions and the role of accounting standards in the international business community. Activities that may be included in the course are ethical issues in business decision, financial information on the internet, research papers, group projects, class presentations, and computer spreadsheets.

**ACC 724 — Intermediate Accounting II (3 credits)***Prerequisite ACC\*723*

A comprehensive study of the preparation and use of financial reports for business decisions and the role of accounting standards in the international business community. Activities that may be included in the course are ethical issues in business decision, financial information on the internet, research papers, group projects, class presentations, and computer spreadsheets.

**ACC 735 — Cost Management Systems (3 credits)***Prerequisite ACC\*505*

A study of the design and use of modern cost management systems. Topics include product costing, activity-based costing and management, profit planning, performance measurement, and strategic decision making and control. Computer applications, a writing component, and group projects included.

**ACC 736 — Advanced Accounting (3 credits)***Prerequisite ACC\*724*

A study of the special accounting information needs of the various forms of accounting entities, whether large or small, public or private, profit or nonprofit. Topics include business combinations, multinational corporations, segment reporting, partnership accounting, bankruptcy, and estates and trusts. Computer applications included.

**ACC 746 — Auditing (3 credits)***Prerequisite ACC\*724*

A study of the theory and practice of auditing. The primary focus is on audits of the financial statements performed by independent accountants. Auditing integrates accounting standards and practices, legal liability for public accountants, and ethical expectations as prescribed in the AICPA Code of Professional Conduct, culminating in the examination of audit evidence and preparation of the auditor's report. Computer applications and group projects are included.

**ACC 747 — Tax I (3 credits)***Prerequisite ACC\*724*

A conceptual study of United States federal income taxation. The current income tax code as it relates to individuals, corporations, partnerships, and other taxable entities is introduced. Practical tax problems are reviewed to demonstrate the proper application of the tax code, current issues in tax accounting and tax planning are considered. Computer applications included.
