

# ACCELERATED THREE-YEAR DEGREE PLAN

---

An accelerated three-year degree plan is offered to qualified students. A student accepted into this plan receives a degree within three years instead of the usual four. To do so, the student must complete successfully the degree requirements by combining summer sessions with six-course-unit semesters in fall and spring.

Eligibility is restricted to incoming freshmen who meet certain qualifications (high school class ranking and S.A.T. scores) and to sophomores with high academic performance during their freshman year.
