

GACIOCH CENTER FOR CAREER AND PROFESSIONAL DEVELOPMENT

The Gacioch Center for Career and Professional Development offers programs and resources to support students and alumni in developing and achieving their career objectives. Students are encouraged to proactively engage with the Career Center staff throughout their time at Niagara for help with career decision-making, job search skill development, internships, and student employment. The Career Center integrates current technology with personal contact, enabling students and alumni to build the skills and relationships they need for professional success.

Internships

Internships are one example of Niagara's commitment to active integrative learning. They are closely aligned with the curriculum and can be either paid or unpaid. Niagara's internship program is an effective means of exploring and evaluating career interests, and developing skills for professional life. Students are encouraged to consider internship opportunities and plan early with their academic advisor and the Career Center to maximize their internship success.

Student Employment

Student Employment is an opportunity to earn income during the school year, explore career options and develop skills employers seek. Federal Work study placements as well as all other on-campus student employment is managed by the Gacioch Center for Career and Professional Development.
